

BED BUG TREATMENT NOTIFICATION

Cimex lectularius

Treatment Date:

Time:

Unit#

Dear Owner/Tenant: On inspection or identification we have confirmed Bed Bug activity within your unit or home. In order for us to perform the best treatment we can, we ask you to please complete the following:

De-clutter as much as possible this will assist in removing potential bed bug harborages. Check items for signs of infestation. Remove all unnecessary cardboard boxes, loose papers, garbage and recycling. Ensure floors are clean of debris and items especially around perimeter of rooms.

Remove all bedding and bed skirts and laundry on hottest setting. Do not replace until after treatment.

Vacuum baseboards to remove dust build-up from these areas. Remove the vacuum cleaner bag or contents of, place in a plastic bag, and dispose of in the trash can outside your apartment/home.

Cover fish tanks, terrariums and small animal cages with a clean towel or sheet. Finally, remove all sheets, covers, dust ruffles, comforters, pillows, and any other bedding covers from your mattress and box spring in all bedrooms. Place items in sealed bag.

DO NOT RE-ENTER TREATED AREAS FOR 2-4 HOURS AFTER SERVICE.

DO NOT SPRAY ANY PESTICIDES OR CLEANING PRODUCTS IN TREATED AREAS AFTER THE APREHEND® TREATMENT. THIS WILL KILL THE APREHEND® AND RESULT IN CONTROL FAILURE.

Bed bugs will begin to die within 4-7 days of being exposed to treatment. You may see live bed bugs for up to 3-4 weeks following application. Bed bugs exposed to Aprehend will often wander and die out in the open. This is normal although it may be alarming to see bed bugs in places you have not seen before. We will be returning in 30 days to evaluate treatment. Aprehend will remain active for up to 3 months if not exposed to water or cleaners.

BEFORE OR AFTER TREATMENT, ALL BEDDING AND PILLOWS MUST BE HOT LAUNDERED, OR PUT THROUGH THE HOT CYCLE OF THE DRYER FOR 20-30 MIN. DO NOT OVER PACK DRYERS.

If units are not in a state where our service technicians can lift and turn furniture, or clutter is interfering with treatments, we may not be able to solve your bed bug problem.

PESTICIDE USE NOTICE

Aprehend

Beauveria Bassiana Strain GHA viable spores 2.2 X 10⁹/ml
PCP # 33745

BC Poison Control Information Centre 1-800-567-8911

For the above products Health Canada recommends that all pets and occupants vacate until treatments have dried. Please do not enter treated areas for 2-4 hours during and after treatment.
